concept zine // issue #5 // jun '26 // companion to #3 (medallion)

#3 named the three layers. Here's what actually sits in each – every box is a real schema in the lake right now.

--- BRONZE · raw, as the source sent it -----

- **Catalog (Sierra MARC)** – catalog.bibs_current – ~2.1M bibs
- **Circulation** – circ_trans.transactions – ~48M rows
- **OpenLibrary** – bronze.openlibrary_works – (new)

--- SILVER · cleaned & joined -----

- **Libby checkouts** – overdrive_refined.checkouts
- **Work identity** – dim_work / bib_work_map – one book, all its editions
- **Reading-list matches** – int_matches

--- GOLD · ready marts, pull-and-go -----

- **Title & audience** – overdrive_enriched.dim_title · daily_by_audience
- **Reading-list results** – reading_lists_gold.fct_match
- **Reading levels** – fct_reading_level – (public)

--- PLATFORM · the governance spine -----

Every load logged, validated, freshness-tracked: _platform.runs ·
_platform.validations · _platform.tenant_health

Raw kept · refined once · served ready · every run accountable. Full inventory on the back.

read it now – rayvoelker.github.io/2026-06/issue_5_schemas/

WHAT'S IN THE LAKE
